

Leading-edge solutions for industry

An engineering group of companies
with manufacturing excellence

Who We Are

A world class group of companies, providing industrial solutions globally, being in touch with customer's needs, being perceptive to customer's expectations, offering custom-tailored answers. We have the right skills and passion to build safe, sustainable and progressive plants, to cope with fast moving technological processes, digitalization, increasing consumer needs and expectations in a world that is changing more rapidly than ever before.

Our Values

Values guide our actions and define how we work together as a team and consequently with our customers, our partners in close interface with society and environment. We stay true to our values and ethics, moving forward with respect to our tradition and roots.

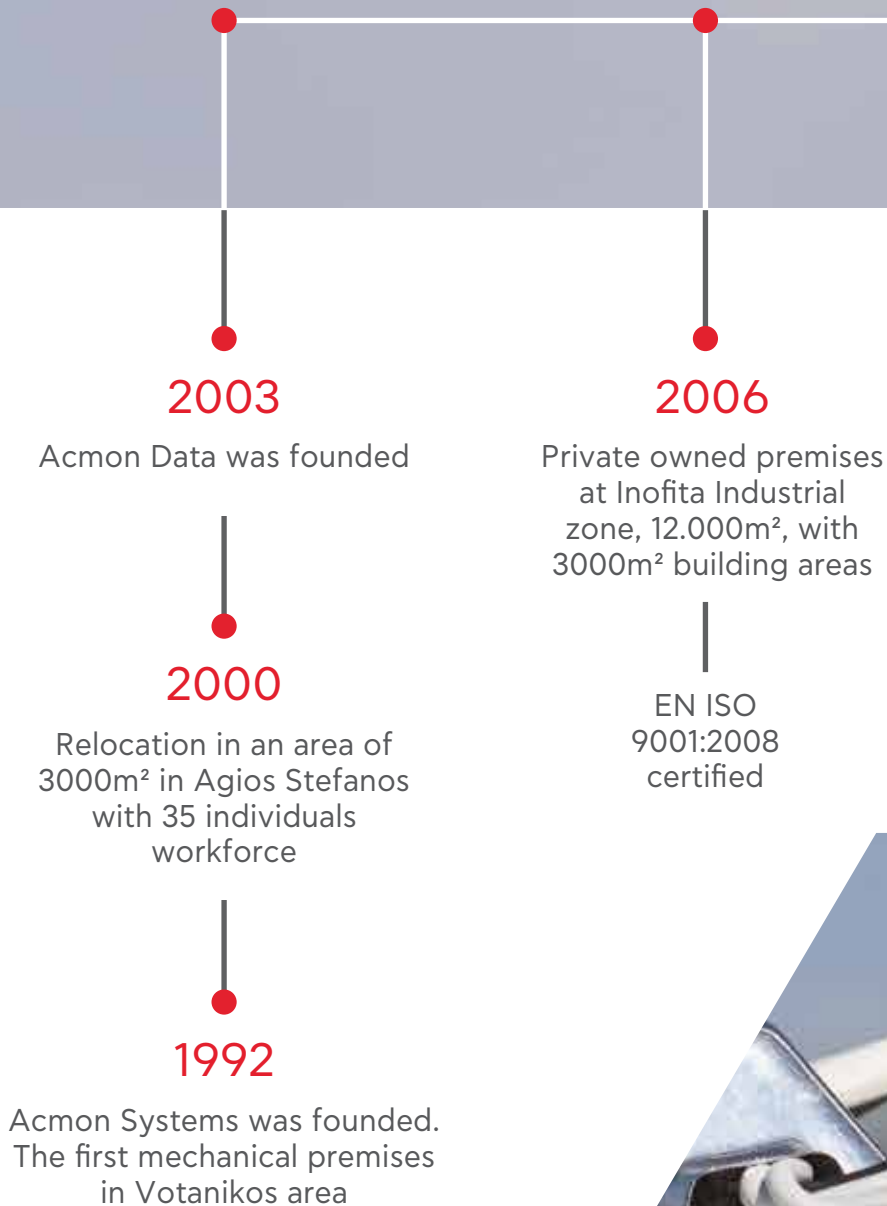

- ▶ People come first
- ▶ Purpose driven
- ▶ Learn from experience
- ▶ Keep it simple
- ▶ Solution minded
- ▶ Be confronted with challenges
- ▶ Look at the problem from a different perspective
- ▶ Personalized approach & solutions
- ▶ Willing to change and adapt

Our Global Presence

A very important factor of ACMON's success is its focus on international expansion. It was a strategic decision the fact that the wealth of the company could not be limited within Greek boundaries. Being International gives us the competitive advantage of diversity. Different ideas and perspectives lead to innovation and to multiple angles of a technological challenge. International presence builds thorough experience of versatile environments, products, customer needs and international safety regulations, leading to uniform high tech solutions will being able at the same time to adapt to unique factory peculiarities.

Our Partners

Trustworthy partnerships in key-regions of activity are being carefully selected. Through a perpetual process we choose partners who can blend expertise and experience with local markets needs integrating Acmon Group's values and vision.

International
footprint

Turnkey Solutions

Providing cost effective, high quality, high ROI plants on a turnkey basis all around the globe, without the use of third parties and conflicts along the way

Solid Project Management Team

A customer journey starts from your idea, needs and specs to become a full live and functional plant with the same project management team

Engineering & Design

We transform your needs to a conceptual design and then to a 3D Visualization so you can fully comprehend the plant before manufactured

Customer Care

Pre-Sales Care - F.A.T & S.A.T - On Site & Virtual

Post sales Care - Remote Support - Support Line 24/7

Lifetime Partner

We don't work on a project basis but on a lifetime time partnership. We create strong bonds with our customers

Why
Acmon

We Are Acmon Systems

Acmon Systems is an engineering company with manufacturing excellence at the centre of all activities, specializing in the field of bulk material handling and process engineering solutions to a vast range of industry sectors. From conceptual 3D design and process analysis to final assembly, commissioning, start up and plant hand over all originated from one single source with a single responsibility.

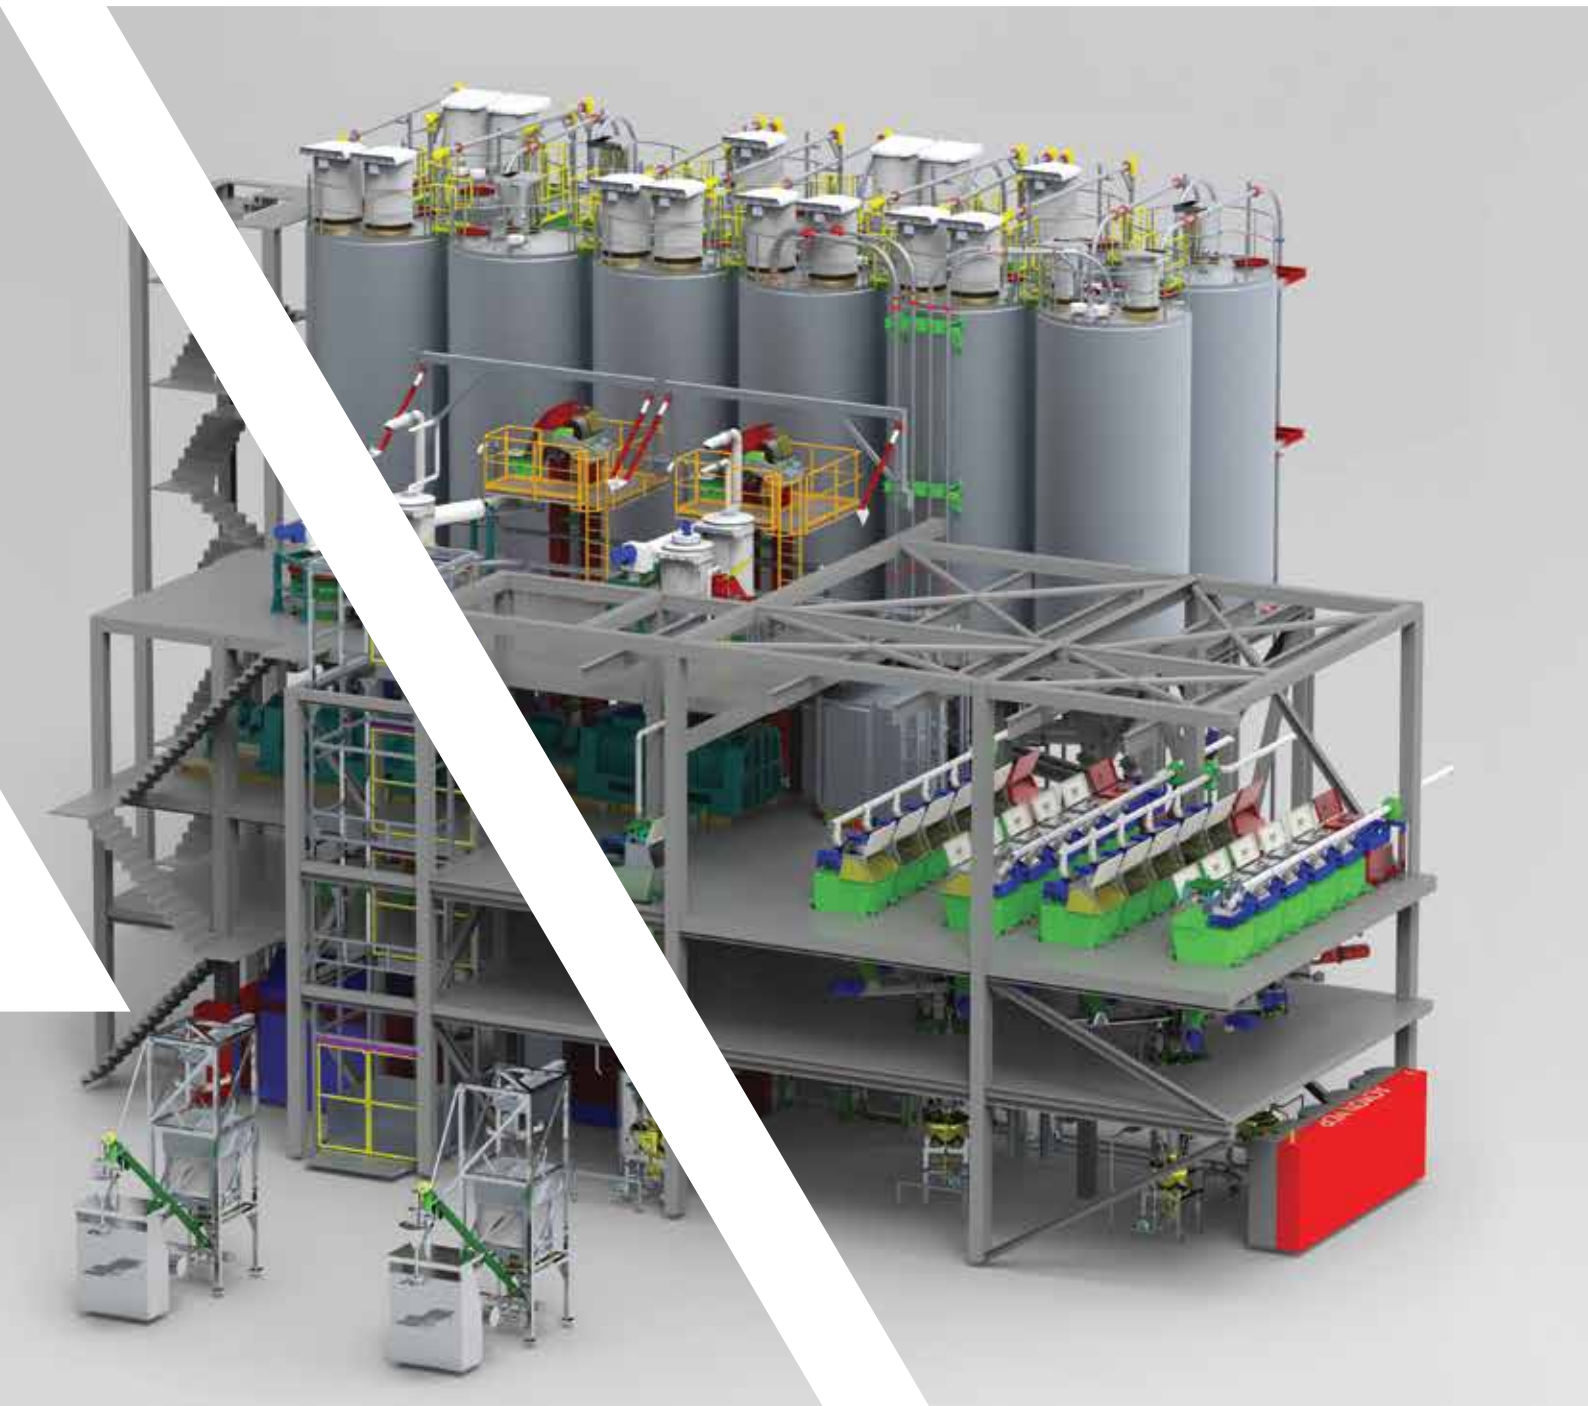

We strive to identify our name with agility and adaptability, being a passionate team of engineers working intensely to provide the ultimate solution to every project, deliver added value to you, to your customer and to support a sustainable industrial supply chain.

Acmon Systems superior performance is based on the vast know-how and a proven track record of 30 years, through a high level of professionalism and the ability to create new or customize our standard solutions and modules to meet customer's individual needs.

Acmon systems provides state-of-the-art bulk material handling and process engineering solutions for almost every type of production facility irrelevant of how simple or complex, big, or small this might be.

- ▶ Storage Solutions
- ▶ Pneumatic Conveying
- ▶ Mechanical Conveying
- ▶ Weighing & Dosing
- ▶ Mixing, Homogenization
- ▶ Bagging & Palletizing
- ▶ Process Control

We Are Icon Systems

Automation and robotics are on the rise and are present in countless production facilities. Icon Systems configures intelligent production automation systems using advanced robotics and high-end technologies in order to meet increasing production demands, multiple product variations, cost reduction pressure and extremely high standards of quality and performance.

Icon Systems' engineering team designs solutions that achieve the most efficient, productive and safe production process based on your particular needs and resources. Smart all-in-one systems, utmost safety standards and straight-forward integration into existing systems are some of the key factors that guide us throughout the whole process of designing and implementation.

Man and machine do not compete. Instead they complement each other. A robot never gets tired carrying out repetitive tasks over long periods of time while maintaining consistent quality results. Contrarily, a human can react with speed and ingenuity to new requirements.

The role of artificial intelligence is not to take the human out of the process but to take robots out of the human. We have this quote in our mind every time we design for you.

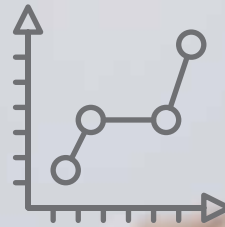

- ▶ Conveying Systems
- ▶ Case Packing
- ▶ Palletizing Systems
- ▶ Robotics
- ▶ Pallet Wrapping
- ▶ E-Commerce Solutions

We Are Acmon Data

Acmon Data implements software solutions that transform production processes into smart, interconnected, digitalized modern factories.

TracePro, a software application designed and developed exclusively by Acmon Data, is the most intelligent solution for your assets' production control and warehouse management, as it is able to integrate with any ERP. Thusfully digitalizing your factory.

Product inspection and print & apply systems, as well as weighing and production process solutions are offered by our team, comprised by exclusive agents of the most acknowledged brand houses, leveraging your production in terms of quality and ROI.

Innovation powered by inspiration

TracePro

- ▶ Production Control
 - ▶ Warehouse Management
 - ▶ Traceability
 - ▶ Data Collection
 - ▶ Batch Execution
 - ▶ X-Ray Systems
 - ▶ Metal Detector Systems
 - ▶ Labelling Systems
 - ▶ Check Weighing Systems
 - ▶ Industrial Weighing Systems
 - ▶ Filling & Capping Systems

Turn-key solutions for industrial projects

In an era where companies need to be agile and complete new projects rapidly with a high-reliability percentage, Acmon Group is well-positioned to provide turn-key solutions in a wide range of industries.

The combination of Acmon Systems, Icon Systems and Acmon Data manages to provide a complete team of professionals with a high level of expertise regarding any project that refers to the setup of a factory. No matter the project's requirements, Acmon Group has in place all the necessary tools and human resources for implementing it.

In addition, Acmon Group oversees every part and phase of each project, including subcontractors, so the clients will only need to communicate with the person in charge and his team. Acmon Group has a unique experience with a profound set of know-how and expertise in various industries, having carried through numerous complex projects.

Guarantees of quality, skills and knowledge

In a world of rapid changes, everyday technology innovations and the continuous introduction of new and advanced procedures, certifications are the safest way to prove the constant emphasis on updating skills and knowledge. Acmon Group acknowledges the need for training and to be certified by all its main partners and solution providers and has prioritized the process for every group company.

Member companies of the Group have a long list of certifications, providing guarantees to any customer about the level of know-how and expertise in place. In addition, Acmon Group invests in the development of its people and the certification process.

The list of certifications is ever-expanding to make sure we meet the standards of industries we are operating in. The same apply during the implementation, installation and commissioning.
